THNK

Thank you for taking the time to complete this survey! We hope that you will participate in our next survey. Some of the questions in this study presented statements that are false. The current evidence suggests that:

- The fatality rate of COVID-19 has **NOT** been exaggerated in the media
- New vaccine technologies for COVID-19 do **NOT** alter your DNA
- The COVID-19 vaccine does **NOT** cause infertility
- Pharmaceutical companies did **NOT** take shortcuts that compromise the safety of the COVID-19 vaccines
- It is **NOT** better to have natural immunity against the virus than artificial immunity
- The prolonged use of masks **CANNOT** cause CO2 intoxication and oxygen deficiency
- COVID-19 vaccines are **NOT** resulting in new variants of the virus

The present study deals with topics that you might have found distressing. If you found participation distressing, we want to encourage you to consider free mental health services including the following: Crisis Services Canada and other resources:
